## Oliver Technology Group, LLC

Oliver Technology Group (OTG) core business is providing high quality Information Technology consulting services to public and private sector organizations. Our knowledgeable & highly skilled consultants strive to deliver efficient & effective IT solutions on schedule and within the allotted budget.

# *Learn. Think. Do.*

## Services Offered

### Website Design & Development

A well-built website is critical to success in every industry in today's climate. OTG can build and deploy a website that capture the essence of your business. An online presence is critical to growth across all sectors of business.

### Project Management

Project Management Professional (PMP) certified project management expertise. Experience managing high visibility projects in both the public & private sectors. A focus on managing day-to-day project tasks to meet & exceed client expectations on time and within budget. End to end knowledge from project planning through deployment.

### Business Analysis

Experienced Business Analysis capable of understanding, identifying and documenting usable requirements. Expertise in bridging the gap between technical and non-technical stakeholders to verify clear communication & definition of requirements.

### Software Test Engineering

Skilled Software Test Engineers capable of documenting & executing testing including but not limited to functional, regression, 508, performance, mobile and web services. Insuring project deliverables meet the initial requirements and client expectations reducing the need for rework and additional development costs.
